

Solarfun Power Holdings CO.,LTD

Solarfun to Supply Nobility Solar Projects With 14.2MW of High Efficiency Modules

SHANGHAI, China--Solarfun Power Holdings Co., Ltd. ("Solarfun" or "the Company") (NASDAQ:SOLF), an established vertically-integrated manufacturer of silicon ingots and photovoltaic (PV) cells and modules in China, today announced that Nobility Solar Projects a.s. ("Nobility") has agreed to purchase 14.2MW of high efficiency PV modules from Solarfun during the second half of 2009. Nobility, a leading distributor of solar products in Eastern Europe, is Solarfun's distribution partner in the region.

Peter Xie, President of Solarfun, commented, "Eastern Europe, and specifically the Czech Republic, is a good new developing market for solar products. Our agreement with Nobility demonstrates our ability to not only penetrate new markets, but also quickly increase high quality, high efficiency PV module shipment volumes. Nobility is the leading distributor of solar products in Eastern Europe and we are pleased to be a part of this growing business relationship. This agreement also reflects an improvement in demand that we see for our business in the second half of the year."

Lubomir Bures, Vice President of Nobility, declared, "This agreement secures Nobility a strong bankable partner for module deliveries. Through this partnership, Solarfun gains a significant market share in the Czech Republic and other Eastern European countries, which would be very hard to achieve without a strong local partner."

About Solarfun

Solarfun Power Holdings Co., Ltd. manufactures ingots and PV cells and modules and supplies solar system integration services in China. The Company produces both monocrystalline and multicrystalline silicon cells and modules, and manufactures 100% of its modules with in-house produced PV cells. Solarfun sells its products both through third-party distributors and directly to system integrators. The Company was founded in 2004 and its products have been certified to TUV and UL safety and quality standards. SOLF-G
